Designed to make life easier

The Office for Disability Issues estimates there are over 11 million disabled people in the UK. More than 10 million people in the UK suffer some form of hearing loss, that's one in six of the population. 3.7 million of these are of working age (16-64) and 6.4 million are of retirement age.

Age UK forecasts the number of people reaching 65+ will rise by nearly 50% in the next 20 years. An already large market, which will only grow, this group is often overlooked. Take a look through our showcase of the latest products designed to make life easier for people suffering impairments.

Key Features

Many of these products are designed with key features to help make life easier. Rather than list them all, we've developed some handy icons to highlight the key features.
